DETAILED ACTION

Allowable Subject Matter

Claims 1, 4-10 are allowed over the prior art of the record.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

After further search and consideration it is determined that the prior art of record neither anticipated nor renders obvious the claimed subject matter of the instant application as a whole either taken alone or in combination, in particular, prior art of record does not teach "DC-DC converter that includes a synchronous semiconductor device and a control semiconductor series connected with said synchronous device" as recited in applicant argument page 5, filed on 11/08/2007 and also "a termination structure, said termination structure including, a termination trench having a slanted sidewall formed in said semiconductor body, and a grown field oxide layer formed in said termination trench below said major surface, a polysilicon field plate formed over said field oxide layer, and a low temperature oxide body over said polysilicon field plate, wherein said field oxide layer is thicker than said gate oxide layer, wherein said metallic contact extends over said low temperature oxide body, and wherein said semiconductor body of said first conductivity extends from said trench to the bottom of said termination trench as recited in claim 1.

Claims 4-10 are also allowed as being directly or indirectly dependent of the allowed base claim(s).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
